ACEC/MO - AT A GLANCE

The American Council of Engineering Companies of Missouri, Inc., ACEC/MO, is an organization of professional engineering firms in private practice. Formed July 12, 1955 and incorporated under the laws of the State of Missouri, ACEC/MO, is a founding member organization of American Council of Engineering Companies (ACEC). The objectives of the organization as expressed in its Strategic Plan are:

- **BUSINESS AFFAIRS** - Provide opportunities for member firms to advance their business practice of consulting engineering,
- **PUBLIC AFFAIRS** - Promote image and effectiveness of ACEC/MO and its member firms,
- **GOVERNMENTAL AFFAIRS** - Maintain a strong governmental affairs program,
- **ORGANIZATIONAL AFFAIRS** - Provide staff and organization that meets the long-term needs of the Council and its member firms.

ACEC/MO promotes professional qualifications-based selection for design services. ACEC/MO

provides educational, professional, and insurance programs for its members and their employees.

ACEC/MO disseminates information explaining the professional principles and services of consulting engineers. It conveys to the general public the meaning of private professional engineering practice, and aims to develop understanding and appreciation of the scope and value of services provided by consulting engineers.

ACEC/MO publishes a directory of its members, which is made available to potential users of engineering services. **ACEC/MO's annual Engineering Excellence Awards** honor engineering achievements demonstrating the highest degree of merit and ingenuity. Winning Missouri projects are submitted to the ACEC national competition.

ACEC/MO has over 120 member and associate member firms, representing over 350 member firm principals and over 8,700 employees.

PAST PRESIDENTS

1956	Joe Williamson, Jr.	1982	John A. Boyd, Jr.	2008	Robert L. Goodwillie
1957	Hueston Smith	1983	Robert C. Flory	2009	David A. Diestelkamp
1958	Jack Harvie	1984	Samuel Wolfenbarger	2010	Phillip E. Borrowman
1959	Fusz Thatcher	1985	George M. Sallwasser	2011	Edmond D. Alizadeh
1960	Louis Hamig	1986	Robert G. Wade	2012	Daniel M. Wilson
1961	Wil Rath	1987	Edward Edgerley, Jr.	2013	Thomas R. Gredell
1962	Edward Dabler	1988	Robert G. Crabtree	2014	Linda L. Moen
1963	Clyde S. Hale	1989	William L. Durbin	2015	Gene R. Hinshaw
1964	Donald K. Ross	1990	Gordon R. Pennington	2016	Daniel R. Meckes
1965	Willard W. Given	1991	Theodore J. Cambern, Jr.	2017	Michael S. DeBacker
1966	Charles H. Zurheide	1992	Paul J. Marshall		
1967	Brice R. Smith, Jr.	1993	H. Jerome Butler		
1968	Charles W. Keller	1994	Leonard C. Kirberg		
1969	Dean R. Felton	1995	Laurence T. Schaper		
1970	Clarence C. Palmer	1996	Michael A. Postiglione		
1971	Willard W. Given	1997	Edward J. Mulcahy		
1972	William G. Riddle	1998	James K. Van Buren		
1973	D. W. Ryckman	1999	Dave G. Ruf, Jr.		
1974	William A. Herrmann	2000	Edmund C. Johnson		
1975	James E. Moulder	2001	G. Kelley Gipple		
1976	John H. Robinson	2002	Robert E. Polk, Jr.		
1977	Erwin R. Breihan	2003	Kevin R. Eisenbeis		
1978	Donald M. Duncan	2004	Marc H. Alper		
1979	Richard E. Beumer	2005	David E. Hamilton

ACEC

The American Council of Engineering Companies, (ACEC), 1015 15th Street, N.W., Suite 802, Washington, D.C. 20005, Phone: 202-347-7474, is the national organization of engineers engaged in the practice of engineering. It is made up of 51 Member Organizations of which ACEC/MO is one.

ACEC is devoted to the advancement of the practice of engineering, to the promotion of private enterprise and to the improvement of the business environment of professional engineers engaged in engineering.

ACEC is the source of information and cooperative services for common purposes and benefits to all members in the various branches of engineering.

It works for maintenance of the highest ethical standards and speaks for engineers throughout the United States. ACEC disseminates information explaining the services and value of engineers to other professional organizations, business, government, and the public.

ACEC now has over 5,000 member firms, with more than hundreds of thousands of engineers, architects, land surveyors, scientists, and other specialists.

ACEC/MO members have actively served and continue to serve the national organization in several capacities such as trustees of the ACEC insurance program, as national officers, and as chairman and members of ACEC committees.

ACEC FELLOWS

The American Council of Engineering Companies is proud to recognize the following Missouri engineers who have been recognized by ACEC as Fellows. The Fellows program gives recognition to engineers who have made notable contributions to the profession of engineering.

Marc H. Alper
David A. Diestelkamp

* David H. Lillard

QUALIFICATIONS-BASED SELECTION METHOD

The following is Missouri Law (RSMo Section 8.285 to 8.291) regarding the procurement of professional design services and its purpose to insure that the State and its political subdivisions receive the most competent professional services available, based on demonstrated qualifications for the type of services required. Federal law reflects the same procedure and ACEC/MO recommends this procedure to any potential user of design services.

8.285. Policy on contracts for architectural engineering, land surveying services. -- It shall be the policy of the state of Missouri and political subdivisions of the state of Missouri to negotiate contracts for architectural, engineering and land surveying services on the basis of demonstrated competence and qualifications for the type of services required and at fair and reasonable prices.

8.287. Definitions. -- As used in sections 8.285 to 8.291 unless the context specifically requires otherwise:

(1) **"Agency"** means each agency of the state and each agency of a political subdivision thereof authorized to contract for architectural, engineering and land surveying services;

(2) **"Architectural services"** means any service as defined in section 327.091, RSMo;

(3) **"Engineering services"** means any service as defined in section 327.181, RSMo;

(4) **"Firm"** means any individual, firm, partnership, corporation, association or other legal entity permitted by law to practice the profession of architecture, engineering or land surveying and provide said services;

(5) **"Land surveying services"** means any service as defined in section 327.272, RSMo;

(6) **"Project"** means any capitol improvement project or any study, plan, survey or program activity of a state agency or political subdivision thereof, including development of new or existing programs.

8.289. Agencies using services to be furnished statement of firm's qualifications and performance data. --

Present provisions of law notwithstanding, in the procurement of architectural, engineering or land surveying services, each agency which utilizes architectural, engineering or land surveying services shall encourage firms engaged in the lawful practice of their professions to annually submit a statement of qualifications and performance data to the agency. Whenever a project requiring architectural, engineering or land surveying services is proposed for an agency of the state or political subdivision thereof, the agency shall evaluate current statements of qualifications and performance data of firms on file together with those that may be submitted by other firms regarding the proposed project. In evaluating the

qualifications of each firm the agency shall use the following criteria:

(1) The specialized experience and technical competence of the firm with respect to the type of services required;

(2) The capacity and capability of the firm to perform the work in question, including specialized services, within the time limitations fixed for the completion of the project;

(3) The past record of performance of the firm with respect to such factors as control of costs, quality of work, and ability to meet schedules;

(4) The firm's proximity to and familiarity with the area in which the project is located.

8.291. Negotiation for contract -- not applicable, for certain political subdivisions. --

1. The agency shall list three highly qualified firms. The agency shall then select the firm considered best qualified and capable of performing the desired work and negotiate a contract for the project with the firm selected.

2. For a basis for negotiations the agency shall prepare a written description of the scope of the proposed services.

3. If the agency is unable to negotiate a satisfactory contract with the firm selected, negotiations with that firm shall be terminated. The agency shall then undertake negotiations with another of the qualified firms selected. If there is a failing of accord with the second firm, negotiations with such firm shall be terminated. The agency shall then undertake negotiations with the third qualified firm.

4. If the agency is unable to negotiate a contract with any of the selected firms, the agency shall re-evaluate the necessary architectural, engineering or land surveying services, including the scope and reasonable fee requirements, again compile a list of qualified firms and proceed in accordance with the provisions of sections 8.285 to 8.291.

5. The provisions of sections 8.285 to 8.291 shall not apply to any political subdivision which adopts a **qualification-based selection** procedure **commensurate with state policy** for the procurement of architectural, engineering and land surveying services.

ACEC PROFESSIONAL & ETHICAL CONDUCT GUIDELINES

PREAMBLE

Consulting engineering is an important and learned profession. The members of the profession recognize that their work has a direct and vital impact on the quality of life for all people. Accordingly, the services provided by consulting engineers require honesty, impartiality, fairness and equity and must be dedicated to the protection of public health, safety and welfare. In the practice of their profession, consulting engineers must perform under a standard of professional behavior which requires adherence to the highest principles of ethical conduct on behalf of the public, clients, employees and the profession.

I. Fundamental Canons

Consulting engineers, in the fulfillment of their professional duties, shall:

1. Hold paramount the safety, health and welfare of the public in the performance of their professional duties.
2. Perform services only in areas of their competence.
3. Issue public statements only in an objective and truthful manner.
4. Act in professional matters for each client as faithful agents or trustees.
5. Avoid improper solicitation of professional assignments.

II. Rules of Practice

1. Consulting engineers shall hold paramount the safety, health and welfare of the public in the performance of their professional duties.
 - a. Consulting engineers shall at all times recognize that their primary obligation is to protect the safety, health, property and welfare of the public. If their professional judgment is overruled under circumstances where the safety, health, property or welfare of the public are endangered, they shall notify their client and such other authority as may be appropriate.
 - b. Consulting engineers shall approve only engineering work which, to the best of their knowledge and belief, is safe for public health, property and welfare and in conformity with accepted standards.
 - c. Consulting engineers shall not reveal facts, data or information obtained in a professional capacity without the prior consent of the client except as authorized or required by law or these Guidelines.
 - d. Consulting engineers shall not permit the use of their name or firm nor associate in business ventures with any person or firm which they have reason to believe is engaging in fraudulent or dishonest business or professional practices.
 - e. Consulting engineers having knowledge of any alleged violation of these Guidelines shall cooperate with the proper authorities in furnishing such information or assistance as may be required.
2. Consulting engineers shall perform services only in the areas of their competence.
 - a. Consulting engineers shall undertake assignments only when qualified by education or experience in the specific technical fields involved.
 - b. Consulting engineers shall not affix their signatures to any plans or documents dealing with subject matter in which they lack competence nor to any plan or document not prepared under their direction and control.
 - c. Consulting engineers may accept an assignment outside of their fields of competence to the extent that their services are restricted to those phases of the project in which they are qualified and to the extent that they are satisfied that all other phases of such project will be performed by registered or otherwise qualified associates, consultants or employees, in which case they may then sign the documents for the total project.
3. Consulting engineers shall issue public statements only in an objective and truthful manner.
 - a. Consulting engineers shall be objective and truthful in professional reports, statements or testimony. They shall include all relevant and pertinent information in such reports, statements or testimony.
 - b. Consulting engineers may express publicly a professional opinion on technical subjects only when that opinion is founded upon adequate knowledge of the facts and competence in the subject matter.

- c. Consulting engineers shall issue no statements, criticisms, or arguments on technical matters which are inspired or paid for by interested parties, unless they have prefaced their comments by explicitly identifying the interested parties on whose behalf they are speaking and by revealing the existence of any interest they may have in the matters.
4. Consulting engineers shall act in professional matters for each client as faithful agents or trustees.
 - a. Consulting engineers shall disclose all known or potential conflicts of interest to their clients by promptly informing them of any business association, interest or other circumstances which could influence or appear to influence their judgment or the quality of their services.
 - b. Consulting engineers shall not accept compensation, financial or otherwise, from more than one party for services on the same project, or for services pertaining to the same project, unless the circumstances are fully disclosed to, and agreed to, by all interested parties.
 - c. Consulting engineers in public service as members of a governmental body or department shall not participate in decisions with respect to professional services solicited or provided by them on their organizations in private engineering practices.
 - d. Consulting engineers shall not solicit or accept a professional contract from a governmental body on which a principal or officer of their organization services as a member.
5. Consulting engineers shall avoid improper solicitation of professional assignments.
 - a. Consulting engineers shall not falsify or permit misrepresentation of their, or their associates', academic or professional qualifications. They shall not misrepresent or exaggerate their degree of responsibility in or for the subject matter of prior assignments. Brochures or other presentations incident to the solicitation of assignments shall not misrepresent pertinent facts concerning employees, associates, joint ventures or past accomplishments with the intent and purpose of enhancing their qualifications and their work.
 - b. Consulting engineers shall not offer, give, solicit or receive, either directly or indirectly, any political contribution in an amount intended to influence the award of a contract by public authority, or which may be reasonably construed by the public of having the effect or intent to influence the award of the contract. They shall not offer any gift or other valuable consideration in order to secure work. They shall not pay a commission, percentage or brokerage fee in order to secure work except to a bona fide employee or bona fide established commercial or marketing agencies retained by them.

Adopted October 1980

Special Note:

These guidelines do not prohibit design competitions, free services, or contingent arrangements.

USING THIS DIRECTORY

American Council of Engineering Companies of Missouri Directory 2018-19

The purpose of this directory is to foster a better understanding of the relationships between the client, the public and the professional engineer in private practice.

Firms listed in this directory are members of the American Council of Engineering Companies of Missouri. The firms maintain offices or provide engineering services in Missouri, are staffed and qualified, registered engineers and are pledged to uphold high professional and ethical standards. By their membership, they subscribe to the code of professional conduct established by law and are recognized as responsible, independent and impartial experts in their fields of practice.

This directory of Missouri consulting engineers will assist in securing qualified engineering services for any project. Information is also available on consulting engineering services in other states. For more information about American Council of Engineering Companies of Missouri member firms or members of the American Council of Engineering Companies in other states, write or call ACEC/MO.

How to Use this Directory

Firm Name points to **ABC Engineering, Inc.**

Address points to **3400 Manchester Road
St. Louis, Missouri 63111**

*Phone and Fax Numbers,
E-mail Address, Website* points to **(314) 333-3333** FAX: (314) 333-3334
Email: abc@abcco.com
URL: www.abcco.com

Branch Offices points to **Branch Office:
211 Madison Street
Jefferson City, Missouri 65101
(573) 666-6666 FAX: (573) 666-6667**

Other State Offices points to **Other Offices In:
1 State**

Firm Specialties points to **Rep(s):
John Doe**

Minority Firm Status points to **Activities:
ABC Engineering is a full-service architectural and engineering firm. Offers expertise in the architectural, environmental, geotechnical, planning, surveying, and transportation. Types of clients include cities/counties, governmental, institutional, educational and private sector developers.
Disadvantaged Business Enterprise**

Number of Employees Nationwide points to **55 / 62**

Number of Employees in Missouri points to **55 / 62**

*Principals: Those who own
or run the firm* points to **John Doe**

LISTING OF MEMBER FIRMS

ABNA Engineering, Inc.

35 / 40

4140 Lindell Boulevard
St. Louis, MO 63108-2914
(314) 454-0222 FAX: (314) 454-1235
Email: aadewale@abnacorp.com

URL: www.abnacorp.com

Other Offices in: 1 State

Rep(s): Abe Adewale, Nicole Adewale, Jon Luer, LaWanda Jones
Activities: ABNA provides Structural, Civil Engineering, surveying, GIS/Planning, construction management, Testing & Inspection for public works infrastructure, industrial, educational, healthcare and commercial projects. Types of clients include MoDOT, MSD, Metro, St. Louis Airport, Counties, Municipalities, School Districts, Industrial Corporations, and Park Districts.

Disadvantaged Business Enterprise

Minority Business Enterprise

Women Business Enterprise

Access Engineering, LLC

8

11820 Tesson Ferry Road, Suite 203
St. Louis, MO 63128
(314) 849-8445 FAX: (314) 849-8445

Email: mdennis@acceng.com

URL: www.acceng.com

Rep(s): Marie C. Dennis, Kristyn Newbern

Activities: Access Engineering, LLC provides high quality engineering and construction management services in Missouri and Illinois, specializing in the design of storm and sanitary sewers, trails, roads, bridges and traffic signals in addition to permit requirements for private developments. Types of clients include DOT's, municipalities, sewer districts, park districts and private individuals.

Disadvantaged Business Enterprise

Women Business Enterprise

Advantage Project Management, Inc.

1

800 E. 101st Terrace, Suite 350
Kansas City, MO 64131
(816) 810-4007 FAX: (816) 655-2230

Email: kpemberton@advantage-pe.com

URL: www.advantagepe.com

Rep(s): Kimberly Pemberton

Activities: Offering project management, civil engineering, construction observation and staff extension services. Types of clients include municipal, state, and consulting firms.

Disadvantaged Business Enterprise

Women Business Enterprise

Engineered Corrosion Solutions

13

11336 Lackland Road
St. Louis, MO 63146

(314) 432-1377 FAX: (314) 439-9411

Email: info@ecscorrosion.com

URL: www.ecscorrosion.com

Rep(s): Lucas Kim, Jeff Kochelek

Activities: Engineered Corrosion Solutions (ECS) is a corrosion engineering firm specializing in helping clients understand and manage risk associated with leaking fire sprinkler systems. The risks associated with corrosion in fire sprinkler systems include life safety risk, structure risk, property risk and business continuity risk. Corrosion in fire sprinkler systems leads to plugging problems, reduced sprinkler performance, water leak damage and reduced service life of the systems. Our goal is to define and understand the root causes of corrosion in fire sprinkler systems and to provide devices and services that can bring about a reduction in those risks and associated costs. ECS offers a suite of corrosion management devices and treatment programs that address the needs of all water-based fire sprinkler systems. Wet Pipe Nitrogen Inerting (WPNI) and Dry Pipe Nitrogen Inerting (DPNI) technology from ECS completely controls internal corrosion. ECS also offers a suite of analytical and assessment services to identify the root causes of corrosion and meet the fire sprinkler system inspection requirements by the NFPA. These services include internal video scoping, system failure review, water and deposit analysis, and failed pipe analysis.

Activities: Founded in 1917, HDR is an architectural, engineering and consulting firm that excels at complex projects and solving challenges for our clients. With locations across the nation and abroad, we deliver more than 50 different design and scientific disciplines. The strength of this professional network allows us to deliver big-company resources with small company service. Our operating philosophy is to be an expertise-driven national firm that delivers tailored solutions through a strong local presence. Our ability to draw upon company-wide resources and expertise is a great strength in meeting and exceeding our clients' expectations. In 2008, HDR acquired Archer Engineers, a well respected full service Environmental/Civil Engineering consulting firm. Archer traditionally has provided outstanding service to a wide range of governmental, industrial and private development clients. HDR has full services in water and wastewater systems, transportation systems, environmental and resource management, land planning, surveying, construction administration, and design/build services.
